

# ACYD'HOLIK

## LIVE

Born in the burning spirit of the free party scene, Acyd'holik is the fusion of two masters in the art of distortion and acid chemistry : Acydup and Servaholic.

Dedicated to the fearless exploration of sonic landscapes, it is through an unwavering commitment to the hardware live performance that the french duo has stood out in its beginnings. With a distinctive distortion that defines their signature sound, their music channels the corrosive power of acid into a mixed symphony of industrial noises, tribal rhythms and hypnotic grooves. A swirling vortex of harmony and dissonance that intoxicates the mind and electrifies the body, fueling the rebellious spirit of those seeking an escape from the mainstream.

Today sacrificing their iconic massive rigs in favor of a hybrid ableton-hardware setup, they have not only kept the same spirit, but also the indefectible skills to ensure that each of their performances is a dynamic and unpredictable journey through the realms of mental tekno.
