

LUCHE

LIVE

For years, the electronic scene was confined by strict boundaries between genres. In recent years, however, it seems to have found a new sense of freedom: genres intersect, communities come together... A hybrid evolution bringing a breath of fresh air, and one in which Luche has established himself as a true specialist.

The Nantes-based artist first cut his teeth in the free party scene, where he discovered the sound of acid - a language that has stayed with him ever since. Developing his approach to live performance there, his music soon found its way naturally into clubs and festivals.

With an evolving and epic live approach, Luche crafts a universe where TB-303s, mystical pads and distorted kicks interact. This is where he finds his signature sound : a fusion of acidcore, trance, goa or gabber, in a state of total symbiosis.
