

# LUCHE

## LIVE

Halfway between acid-tekno and trance, Luche shapes a hybrid universe where 303s seem to communicate.

The acid sound, a language that the Nantes-based artist first learned in free party, the theater of his first live sets and creative impulses. Quickly earning his stripes in front of massive sound systems, his music progressively finds its way to clubs and festivals, and meets new aesthetics on its road. Trance and Goa then come to broaden his musical spectrum and release his full hybrid potential.

With an ever evolving and epic approach to live performance, his story comes to life where boundaries are abolished. A story where rolling basslines, mystical synth leads and distorted kicks operate in harmony and join forces in a tireless progression towards the climax, which is only a foretaste of the next one.

Trance, acidcore, gabber... Luche is constantly exploring and evolving, but one thing is sure : where acid leads him, he takes us with him.
