

# MAMAKKAT

LIVE

Some would say it's in its fusion with trance that tekno reveals its full potential...

If that were true, Mamakkat would surely be its finest incarnation.

Hailing from the south of France and based in Montpellier, it is no surprise she spent years roaming psytrance and psytechno dance-floors before setting her sights on tekno and acid sounds.

Navigating the space between both genres, she has quickly made a name for herself in the underground scene thanks to an approach that is both raw and razor-sharp. A perfect blend of tribe, psy and acid that feels like entering a maze in motion — a relentless flow of sci-fi organic layers and pounding analog grooves.

Just leave all expectations at the door, and embrace hybridity in its purest form!
