

RED SCAN

Fueled by imagery from the depths of a dark dream and designed for a future where surrendering to trance and techno is the only conceivable option, Red Scan's music is an auditory alchemy that combines the visceral layers of industrial music, grand-scale rave and mind-bending psychedelic trance. The result is a colossal, supersonic assault on the senses that leave a lasting impact.

As a key member of Union Trance Mission, for which he serves as a sound engineer and dj resident, he has released his first EP "Unstable Mind" in 2019 on the label. Additionally, he has contributed to other renowned imprints such as Vermillion tracks, Innergate Records, COUP and Underzone.

His music is a powerful vessel for exploring spatial dimensions, offering a sonic experience that transcends the boundaries of perception.
