

VELCRO

LIVE / DJ SET

Perfectly embodying the groovy spirit of Tribe while breathing an ethereal and other-worldly atmosphere, Velcro's music stands out as a hybrid sound object whose vibrations overwhelm the whole body. In a world where the different kinds of music are all too often compartmentalized, his universe unfolds with a total freedom of influences.

It's at the early age of 13 that the french artist makes his first steps on a MAD software and develops a particular sensitivity for the acid sound, even before knowing the term. Particularly marked by the omnipresence and the variability of this sound within the electronic landscape, and especially in free party, this sensitivity progressively becomes the strength of his productions.

Between shamanic leads, deep basslines and tribal percussions, Velcro manages to maintain a supremely dynamic yet brilliantly minimalist sound in each of his creations, where acid acts like a narrative thread connecting all pieces of his story. Because this is what his music is all about : a deeply immersive and pulsating story.
