

ZEBULON

LIVE

At the crossroads of goa and psytrance, Zebulon crafts a hybrid experience driven by the acidic pulses of the 303. In this charged space between melody and raw power, a singular universe takes shape, one where trance becomes a language of its own.

His live set, in constant evolution, offers total immersion : relentless rhythms, sharp-edged textures, and intense sonic landscapes. A raw energy that has carried him onto some of the Grand Ouest's key stages, from Dox'Art Festival to Astropolis, all the way to Macadam.

As a founding member of the Symbiose Collective, he actively contributes to the vitality of the independent electronic scene, organizing events that celebrate sonic freedom and collective connection.
